InterSky™ Departure Overview

InterSky™ Solution – is designed for ease of use

- User friendly graphical interface
- Point-and-click user menus
- Simple and intuitive navigation
- Minimum training requirements for personnel

InterSky™ Software – is designed for rapid deployment with minimum disruption to existing operations

- Software configuration can be done largely off-site
- System can be fully tested with customer data
- Training of personnel at customer location

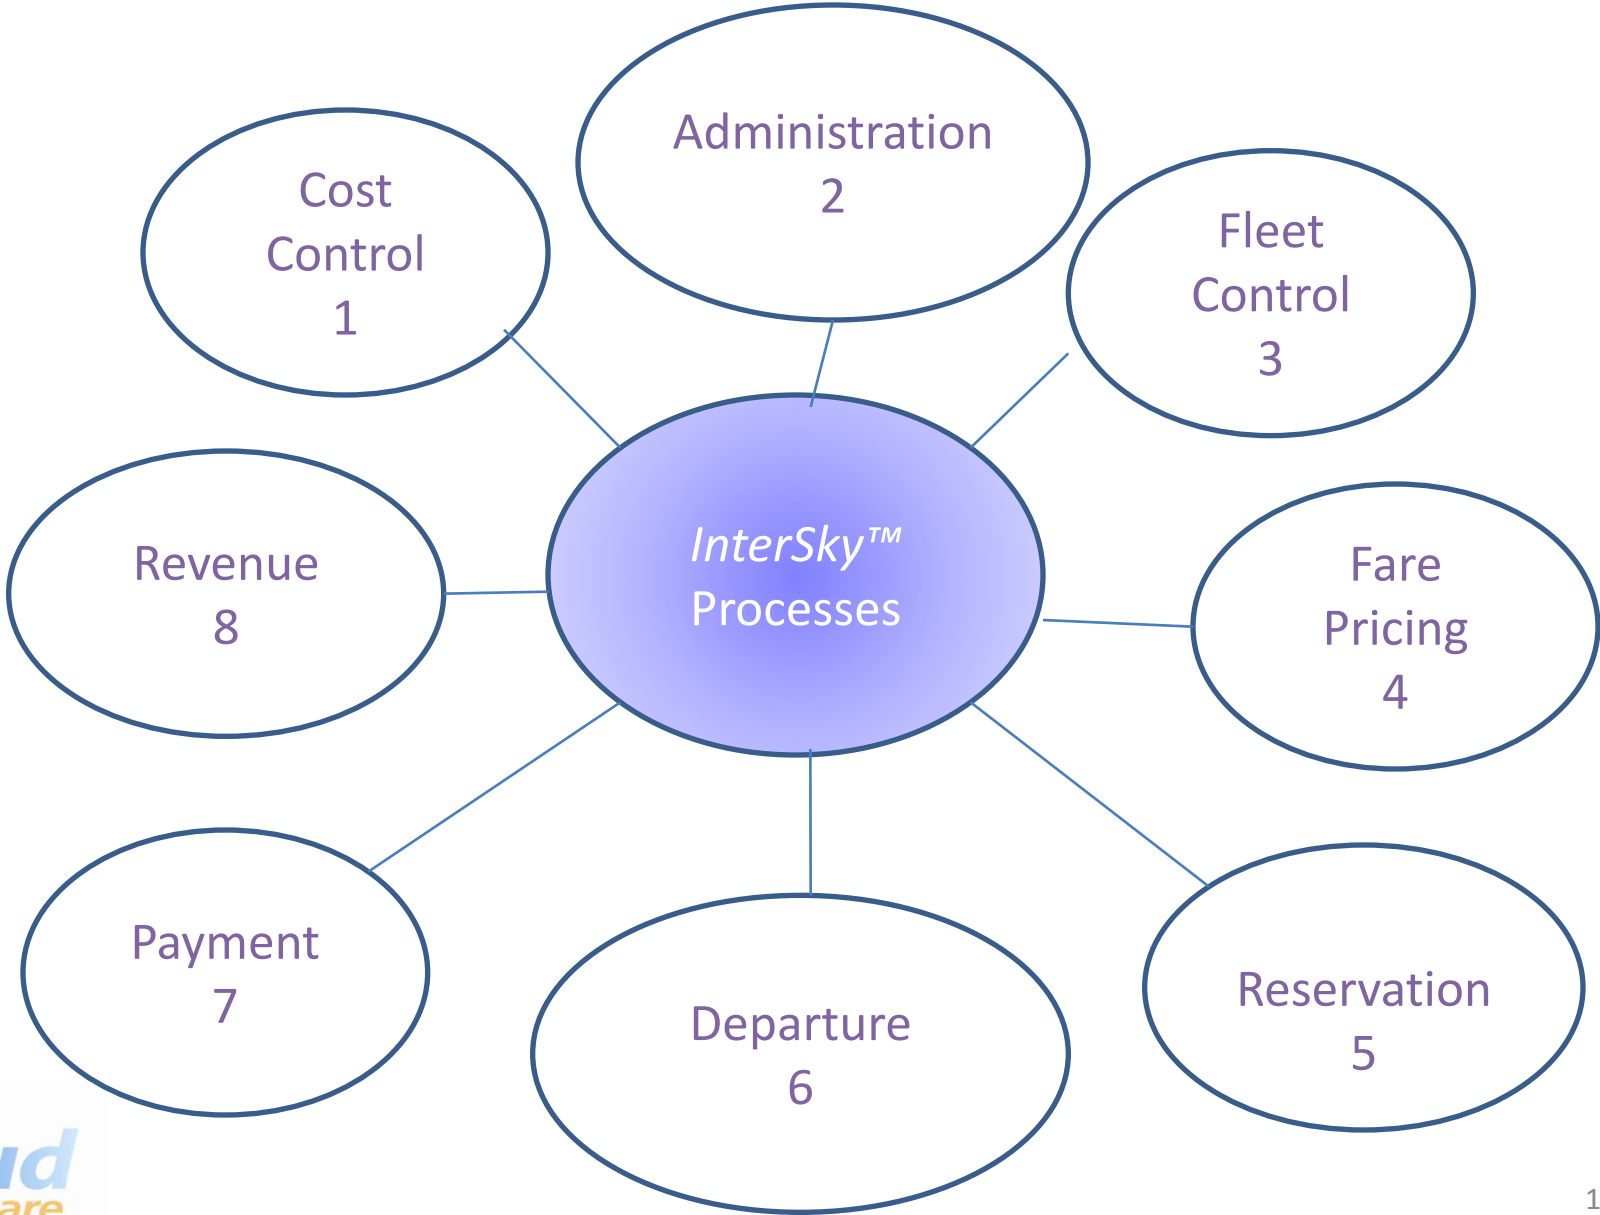

InterSky™ Software can be customised to user requirements

- Interface with existing software/ hardware
- Interface with customer accounting system
- Deploy as common user terminal equipment (CUTE)
- Deploy with wireless hardware
- Deployed as hosted solution

InterSky™ Software Deployment – Hosted Solution

- Small Regional Airlines and Regional Airport Terminal
- Large Airlines and Major Airport Terminal

InterSky™ Software is E-2-E Airline Business System
